## NARRATIVE DIMENSIONS

---

### OUR PLACE IN THE UNIVERSE

---

The main motivation driver of my research has been finding our place in the Universe. By *us* I mean our Galaxy, the Milky Way; by *Universe* I mean its material distribution on its largest scales.

describing the material structure of our Universe on its largest scales. This had led me to work both in simulated universes and most recently on observational projects that aim at making maps of the universe.

### UNIVERSE AESTHETICS

---

You wouldn't destroy a mountain in one year if you knew it took billions of years to be built. Feeling the Universe.

### ASTRONOMY FOR DEVELOPMENT

---

What is development. Building understanding.

### WEAVING LOCAL COMMUNITIES

---

Meeting. Contradictions. The first COCOA to the present. The work in casa-B. Very local involvement with global connections and cosmological feelings.

### OPEN SCIENCE

---

Open-systems, critical engineering culture. All the power to the user.
